This two-week projected was based on our city of Placentia choosing an artist to create a new mural. Each student researched a well-known street and created a profile of artist to share with the “city council” (their peers) and embedded in a Flipgrid commercial promoting their artist.

“There is no way like the American way”

WHY

ROA is a very talented artist and I would love to walk around town seeing his amazing artwork on the walls of our town.

I feel that the city should choose this artist because their art has a story behind it and the way they mix their art is pretty cool.
